

StudyMateAI - Material testues

StudyMateAI eshte nje asistent studimi me GenAI.

Ai lexon dokumente PDF, ndan tekstin ne pjese te vogla,
krijon embeddings me modelin all-MiniLM-L6-v2 dhe i ruan ne FAISS.

Kur studenti ben nje pyetje, sistemi kerkon pjeset me relevante
nga dokumenti dhe perdor modelin google/flan-t5-base per te gjeneruar pergjigje.

Ky projekt perdor vetem mjete falas dhe open-source.
Nuk perdor OpenAI API.

English summary:

StudyMateAI is a GenAI study assistant.

It reads PDF files, creates embeddings, stores them in FAISS,
retrieves relevant chunks, and answers questions with google/flan-t5-base.

This project uses free and open-source tools.

This project does not use the OpenAI API.

Shembull pyetje:

What does StudyMateAI do?

Which model creates embeddings?

Does this project use OpenAI API?
